2003 Building Products Home Runs

Building Products' second annual Most Valuable Product (MVP) Awards

In-O-Vate Technologies. One judge was so impressed by the Dryerbox that he commented: "What a great idea! Why didn't I think of it?" The product is a recessed dryer vent box that saves space in the laundry room because it allows the dryer to be pushed against the wall. It also helps the clothes dryer to operate more efficiently so clothes dry faster and reduces the risk of clothes dryer fires by eliminating the accumulation of lint in the exhaust hose. Dryerbox allows the storage and recoiling of the flex transition hose between the dryer and the wall connection to take place inside the wall cavity, eliminating the zigzag of ductwork. It's made of 22-gauge aluminized steel. Model 350 is 3-1/2 inches deep and model 425 is 4-1/4 inches deep. The Retrofit Box for existing homes is 4 inches deep. Cost: \$19 for new construction models and \$21 for the retrofit. 888-443-7937. www.dryerbox.com.
